## LOT 5 - Banner & Pop Up Stands DISPLAY STAND CATALOGUE

Display Stands and Graphics

### Lightweight Display Stands and Fabric Graphics

You may already be familiar with some lightweight display systems. Roll up banner stands have provided a practical solution for a lightweight display stand for some years now. However, the shortfall with the Roll Up stand is their size. If you require a display stand with a larger presence the size option finish at around 1500mm wide.

Semaphore offers a range of larger display systems which provide a substantial backdrop but are also lightweight. They provide a practical alternative to the traditional magnetic pop up systems.

With graphics printed onto polyester fabrics combined with an aluminium display structure the weight can be kept at an acceptable level. All of the systems we offer can be carried and erected by one person without any risk of injury or strain!

When asked to supply a display solution we always like to offer a few options. The client can then weigh up the various benefits and see how it suits their needs. Initially we would probably offer information and prices but we would always recommend a live demonstration to make sure that the client selects the right product. This is especially true when the product is unfamiliar to the client.

# FABRIC BANNER STANDS

**Lightweight • Durable • Vivid Colours  
Compact • Elegant**

To create a lightweight display take advantage of our new range of printed fabrics. Lightweight, durable fabrics printed (using dye sublimation\*) to create vivid colours and matched with elegant display systems.

Branding at exhibition and conference venues often needs a flexible solution and we provide that with our lightweight and portable fabric display fabrics and systems. No wheeled cases or heavy weights to lug around. Just elegant display systems which are quick and simple to assemble.

You can extend your conference branding by combining your display systems with our hanging fabric banners or printed tablecloths.

## Fabric Choices

**Standard**      205 gsm Polyester fabric  
                  2.3mts wide - up to 6mts  
                  in length

**Deluxe** 375 gsm Polyester lightblock material  
                  zero show through  
                  1.25mts wide - up to 3mts in length

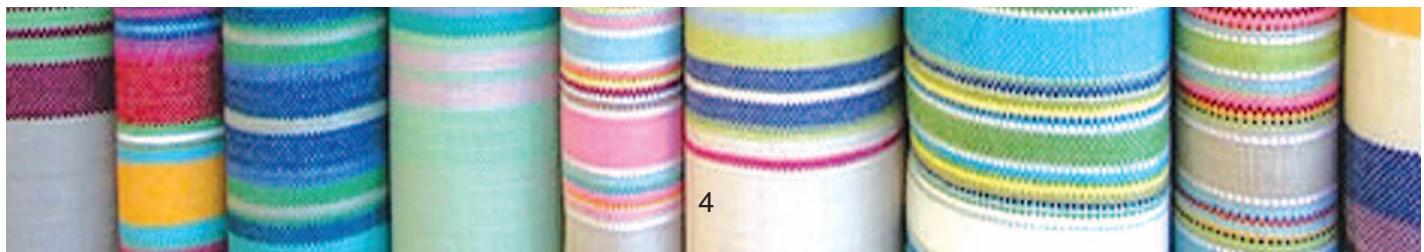

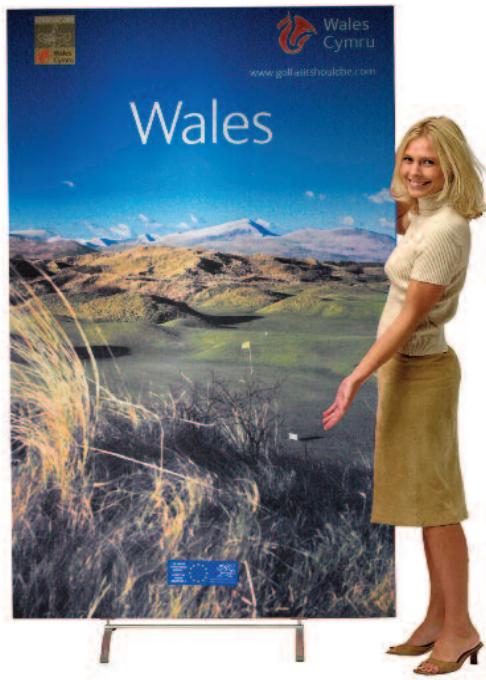

Portable table and custom printed table cloths see page 35

What is 'dye sublimation'?

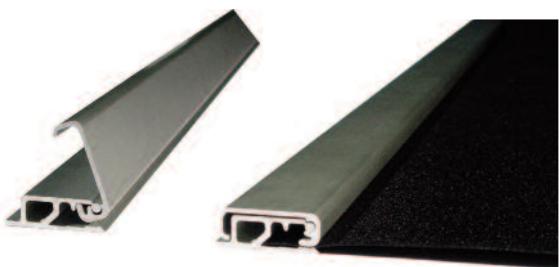

This is a printing system which uses a heat transfer process. The dyes are permanently bonded into the fabric using heated rollers. The fabrics retain their soft feel and can be washed or sponged clean if necessary.

Printed fabric can be used on all of the following display systems illustrated.

**Lightweight, Portable Displays**  
Graphics at 800mm wide and above use  
a 'Twin Base'

**Quick change graphic using a**  
**'Snap Lock' facility**

## FLEX DISPLAY

Aluminium construction, fabric graphics and soft carry cases mean that complete FLEX-display™ systems can weigh as little as 1.5kgs. Many international travellers choose our banners because the smaller banners can even fit in a suitcase. This helps too when it comes to storage.

You don't need to wrestle with FLEX-display™. A few simple parts clicked together and you are done.

### Product Features:

- Gripper style hangers
- Quick change graphic facility
- Extremely portable
- Incredibly Lightweight

**Quick change graphics.** The fabric graphics are clamped to the aluminium rail with a simple 'Snap Lock' facility. Just slide the graphic into the opening and close the rail to secure.

Your display comes from Semaphore with the graphic already attached and ready to be displayed. It is easy to update or change your graphics in the future.

### Easy to assemble

Graphics up to 650mm wide use a 'Cross Base'

A4 Brochure Holder: £44.00 + VAT

To view a video demonstration please visit:  
[www.tech-view.com/flex-display](http://www.tech-view.com/flex-display)

We can create displays up to 6m wide by 2m high with a single graphic supported over several bases. No need to worry about joins and alignment issues.

The 6 metre graphic is supplied in one continuous piece. The aluminium bars are hinged together and simply open out ready to be displayed.

6 metre wide displays are achieved by using either three (450cm) or four (600cm) Twinbase XLs to support one very wide graphic. Graphics are not in sections, they are in one piece and therefore totally seamless.

This display system is also available as a double sided option.

## FLEX DISPLAY GRAPHIC WALLS

### Sizes:

Stand Height:	2100mm
Graphic Height:	2000mm

### Widths: Standard Fabric

2000mm	£455 + VAT
3000mm	£720 + VAT
4500mm	£1,055 + VAT
6000mm	£1,320 + VAT

## DOUBLE SIDED SYSTEMS

### Sizes:

Graphic Height:	2000mm

### Widths: Standard Fabric

2000mm	£850 + VAT
3000mm	£1,235 + VAT
4500mm	£1,855 + VAT
6000mm	£2,460 + VAT

### Accessories:

Halogen Spotlight:	£50.00 + VAT
A4 Brochure Holder:	£44.00 + VAT

This displays use three flexible joints to allow the display to be used straight or angled as you wish. It helps too when folding the display away for transportation and storage.

These mega wide displays are still lightweight and make an ideal portable backdrop.

*Please note: when the frame is angled (as above), you lose the option of having a double sided graphic.*

## SUMMARY OF WEIGHTS & SIZES

To summarise the benefits of the Flex Display System.

### SMALL DISPLAY STANDS

Easily transported by hand. Suitable for small or medium sized venues.

Stand Height: 2100mm Graphic Height: 2000mm

Widths	Weight	Carry Bag Size
600mm	2.5kgs	1.08mts long
800mm	3.0kgs	1.08mts long
1000mm	3.5kgs	1.35mts long
1200mm	4.0kgs	1.6mts long
1500mm	4.5kgs	1.6mts long

#### Safety Issues:

All of these systems are well within the recommended safe lifting weight for one person\*

#### Hand Luggage:

The weight and size of these displays mean that in many case they can travel in a suitcase. The larger stand can be supplied with a 3 piece pole which enable you to transport the display in a 1.35 mtr case.

### LARGE DISPLAY STANDS

Easily transported by hand. Suitable for medium or larger sized venues.

Widths	Weight	Carry Bag Size
2000mm	5.5kgs	2.05mts long
3000mm	7.5kgs	1.60mts long
4500mm	10.5kgs	1.60mts long
6000mm	14.0kgs	2.05mts long

#### Safety Issues:

All of these systems are well within the HSE recommended safe lifting weight for one person\*

#### Hand Luggage:

These items can travel in the hold of a plane. For extra protection we recommend using a polypropylene graphic drum. Large choice available (see right).

300/400mm diameter  
850/1020mm high  
£55 + VAT

#### \* HSE Guidelines

for safe lifting recommend that the maximum weight to be lifted to waist level is:

Women	10-16kgs
Men	15-25kgs

340mm diameter  
1200mm high  
£95 + VAT

## FLEX ACCESSORIES

## ORIGINAL BANNER - 3

**Double Sided Extra Wide Banner Stand**  
As the Original Banner 3 is designed and manufactured in the UK we've ensured this banner is one of the most versatile that we sell, being suitable for a multitude of display applications. Because you can use it to display a graphic up to 2000mm x 2145mm on both sides, it represents one of the most cost-effective large format displays available, yet still on a truly portable scale.

- New hard wearing end plates
- Adjustable feet – ideal for levelling on uneven surfaces
- Quick-change external slide-in leader system for base graphic attachment fabricated from a unique robust extrusion PVC component.
- New design high-specification carry bag with extra padding for durability and protection
- Available in the following widths: 600mm, 800mm, 1000mm, 1200mm, 1500mm, 2000mm
- Custom widths available, up to a maximum of 2400mm
- Available as a single or double sided unit

## EXPAND LINK WALL

The Expand LinkWall allows for the ultimate flexibility to meet the needs of your event space. Simply change the shape by bending it to fit your location. The size is changed by adding or removing panels. This flexible display system includes Expand LinkWall units (banner stand type of products) with flexible panels in between, connected with a patented magnetic solution. The flexible panel has a rubber profile that enables you to change the shape of your display. Combine as many as you like to create your own Expand LinkWall.

### What is the Expand LinkWall?

It is a patented solution with a combination of Expand LinkWall units (banner stand type of products) and flexible linking graphics in between, connected with a magnetic solution. The flexible linking graphic has a rubber profile, which enables you to change the shape of your wall. Combine as many as you like to create your Expand LinkWall configuration.
